

Kouta-Kun Inu

NFT WHITEPAPER

START SLIDE

Welcome

Kouta-Kun Inu Profile

Kouta-Kun Inu is a community and like-minded driven project. Over the years and in recent times, we have had devs rug projects and made away with people hard earned money.

So, a group of fellas came together to give back trust and build a sustainable community.

Kouta-Kun inu is a deflationary Token/NFT project that provides a decentralized financial asset that rewards users with 8% Bnb rewards every 30 minutes directly to their wallets automatically.

The interest and safety of our investors are our top priority. Thereby providing them a top-notch tokenomics. Moreso, our NFT project provides our investors with passive income, in form of staking. Earning 2.5% of Kouta-Kun- Inu which can be converted to BNB when NFT is a stake.

ATTRACT AND GROWTH **COMMUNITY**

Constant communication keeps your project's community-engaged but, strategically timing the release of positive news can kick-start a wave of adoption for your project

An official roadmap keeps users aligned with the project's vision over time, but failing to launch on schedule can cause problems with your community

MARKETING

Promotion through social media influencers can be a powerful way to attract users, but the wrong influencer can dilute or even damage the project's reputation.

A partnership that drives investors' gain and the project's vision is already in process

KOUTAKUNNU

UTILITY AND INVESTORS GAIN

CHECKERBOARD

Checker Board is a built-in Dapp on our website that displays and auto-update tokens supply, Market cap, token holders, tokens price, and liquidity. Thereby, creating a flexible, user-friendly interface and less hassle environment for our holders to quickly check the aforementioned without going to Coin market cap CMC and Coin Gecko.

DIAMOND HAND RESCUER

Diamond Hand Rescuer (D H R) is a methodology used that implements a 25% tax fee on sales, selling below the floor price.

Thereby, introducing a burning mechanism where the funds received will use to buy NFTs in the floor price region and burn them to automatically boost the price and give our investors good returns.

AIRDROP

1.5% of the total airdrop will be given to holders of our tokens. Those who hold above **50\$ worth** of **Kouta-Kun** In will be eligible for this airdrop.

0.5% airdrop will be used for giveaways and contest

BURNING

28% of the token supply will be burned in two batches to lower the total supply and increase the price.

The first burn will take place **24hrs** after the launch

The second burn will take place **3months** after launch.
